👤 PROFILE

Php Full stack developer with 4 yrs of experience in php laravel, I specialize in designing, developing, and implementing solutions spanning a wide range of technologies and programming languages. My proficiency revolves around the meticulous creation and optimization of user-centric websites, where I apply a thoughtful and imaginative approach to craft impactful online experiences. Committed to perpetual growth, I actively pursue opportunities to enhance my skills and knowledge as a Full Stack Developer, always eager to explore new horizons in this dynamic field.

📁 PROFESSIONAL EXPERIENCE

02/2023 – 02/2025
Noida, India

Dogma Systems

Full Stack Developer

I started working as a php laravel developer and worked for OSM Company projects
Company: OSM

Website: <http://www.opensourcemanagement.it> 🌐

As my journey evolved, I have since expanded my expertise, now serving as a Full Stack Web Developer proficient in Laravel (including Inertia and Livewire), Vue.js, NUXT.js, and Tailwind CSS. Additionally,

Furthermore, I am actively engaged in a portfolio of over 10+ projects. I also hold the vital responsibility of being the direct point of contact for all technical discussions and feature-related matters with our valued customers, liaising directly with OSM's CTO, Alessandro. This multifaceted role underscores my commitment to delivering top-notch technical solutions and ensuring client satisfaction.
